# ABSOLUTE Coolant Proof Digimatic Scale Units

**SERIES 572 — With Dust/Water Protection IP66 Level**

## FEATURES

- Newly employed detection method (Electromagnetic induction method) enables use in adverse environments with water and cutting oil.
- Specially designed output cables are developed to maintain the water resistant structure.
- No over speed error since it employs absolute scale which reads the absolute value.
- Once an absolute zero (origin) point is set, the Digimatic Scale Unit shows its absolute distance from the point whenever turned on rather than "0.00".

# ABSOLUTE Digimatic Scale Units

## SERIES 572

### FEATURES

- The ORIGIN key allows setting of an absolute zero point to be used as reference in subsequent measurements. Once set, the ABS Digimatic Scale Unit is ready to show its true position whenever turned on rather than "0.00" as with standard models.
- The ZERO/ABS key allows the display to be zero-set at any slider position along the beam for incremental comparison measurements. This key will also allow return to the absolute coordinate with a display of the true position from the origin point.
- No rack, no pinion, no glass scale. Digimatic Scale Unit is safely embedded in the hardened stainless steel blade.
- Horizontal or vertical face according to the scale mounting direction.
- Special type that is provided with diameter displaying function is available for lathes.
- All units come with two mounting brackets, each located at either end of the scale.
- With SPC data output.

### Linear Scales for Numerical Motion Control System

The Linear Scales for the Numerical Motion Control System are high-accuracy linear measurement systems for a wide range of applications. These types of linear scales are designed to be integrated into precision machines and instruments including measuring machines and instruments, as well as machine tools, optics, data equipment, industrial robots, etc. Two types of linear scales for the Numerical Motion Control System are available: the AT series have the high-accuracy glass scale and the detector head encased together in an aluminum casing for improved durability and resistance against vibration; the ultra-portable and lighter ST series have the scale and the detector head separately.

 Scale input ports: 1  
 Resolution: 0.0005mm, 0.001mm, 0.002mm, 0.005mm, 0.01mm, 0.0002", .00005", .0001", .0002", .0005", .001"  
 Display: 9-digit LED and a negative [-] sign  
 Limit value setting method: Digital switch, Ten-keyboard  
 Power supply: 100-120V/200-240V AC, 50/60Hz  
 Mass: 4.5kg

### Optional Accessory

**907569:** RS-232C Interface Unit  
**907570:** BCD Code Out Unit  
**965004:** External load foot switch  
**937326:** External load box  
**936551:** External zero-set box  
**938140:** Touch-signal probe (shank dia.: 20mm)  
**935094:** Touch-signal probe (shank dia.: 32mm)  
**902329:** Touch-signal probe (shank dia.: 1/2")

Makes it easy to perform such operations as datum point setting (detecting the workpiece edge and setting the counter display to zero), workpiece centering, and dimensional measurement (detecting the workpiece end point and holding the counter display).

### FEATURES

- A 1-axis counter dedicated to sending signals when a linear scale displacement value and a preset limit value coincide.
- Three types of limit settings are available: 2 steps, 4 steps, and 8 steps.
- For controlling a vertical position of an EDM or a grinding machine.
- Can be connected to a personal computer or a sequencer by installing an RS-232C Interface Unit or a BCD Code Out Unit. (Both interface units are optional accessories.)
